## Fieldpiece Instruments Inc.

Fieldpiece Instruments Inc. enters the tool bag market to meet customer demand for quality HVACR Tool Bags. The new BG44 Service Tool Bag from Fieldpiece was designed specifically for HVACR professionals to have in hand everything they need on an initial service call. The patent pending tool organizer is elevated for hand tools so HVACR pros can easily see where everything is and conveniently grab what they need. **Circle 115 on the reader service card.**

## Ritchie Engineering

The new P51-870 Titan Digital Manifold: digital precision with touch-screen convenience. Measures high/low-side P/T, saturation/evaporation temps, and superheat and subcooling calculations; displays them all on a 4.3 in. full-color touch-screen. Connects to smartphone via Bluetooth and ManTooth app. 126 refrigerant profiles included. Features on-board data logging. Vacuum sensor, manifold hoses and backpack included. **Circle 119 on the reader service card.**

## KeepRite Refrigeration

We have the experience and technologies to deliver a fully customized solution for your application. Compressor Rack Systems are engineered to match a wide range of application needs. Remote headers are custom built to suit new or existing equipment, providing easy access for installation and servicing. Visit [www.k-rp.com/mcu](http://www.k-rp.com/mcu) for details. **Circle 116 on the reader service card.**

## Test Products International

Analyze combustion efficiency with your smart phone and the TPI DC710. Combine your smart phone and TPI app with the affordable and easy-to-use DC710 to calculate CO<sub>2</sub>, CO air free, excess air, and efficiency. Easily text or email results directly and instantly to client. Measure temperatures -50°C -1000°C/-58°F-1832°F. Bluetooth, USB input, real-time clock, magnet and hook mounting, and rechargeable battery. DC710, \$449.95 Suggested trade price, [www.testproductsintl.com](http://www.testproductsintl.com). **Circle 120 on the reader service card.**

## NATE

HVACR certification matters. Get an edge on your competition with North American Technician Excellence (NATE). NATE is the only HVACR certification organization developed by the industry, for the industry. Visit [natex.org](http://natex.org) to learn more about the Ready to Work and HVAC Support tests, NATE certification and the Senior Level Efficiency exam. **Circle 117 on the reader service card.**

## Test Products International

DC580 Airflow Meter from TPI. Hot-wire and vane anemometer for easily balancing of commercial and residential HVAC systems. Measure air velocity and temperature simultaneously. Record minimum, maximum and average; with multiple measuring units: m/s, km/h, ft/min, knots, mile/h. Download data to TPI smart phone app using built-in Bluetooth. \$149.95-\$219.95 Suggested list price. Visit [www.testproductsintl.com](http://www.testproductsintl.com). **Circle 121 on the reader service card.**

## Regal Beloit

The Genteq DEC Star blower system's compact, light configuration is specifically developed to reduce the amount of electrical energy that is consumed by the air-moving devices employed in appliances to help meet FER regulations. Now available with axial flux ECM control technology and 11 in. diameter wheel. **Circle 118 on the reader service card.**

## TSI

Interested in simplifying your HVAC and indoor air quality equipment portfolio? TSI provides the most accurate, dependable and versatile ventilation and indoor air quality measurement instruments on the market today. Trust TSI as your one-stop source for instrumentation to save time and money on the jobsite. Visit [www.tsi.com/comfort](http://www.tsi.com/comfort) for more information. **Circle 122 on the reader service card.**
