Bradford White’s AeroTherm Series Heat Pump Water Heater is known for outstanding efficiency. Now it’s available in a 65 gallon capacity to handle higher-demand households. The AeroTherm provides 4 operating modes for added flexibility. Learn more at bradfordwhite.com/aerotherm. Booth #1343. Circle 115 on the reader service card.

Malco Products SBC

Fieldpiece Instruments
Fieldpiece Carbon Monoxide Detector is fast enough for walk-around testing. The SCM4 Carbon Monoxide Detector from Fieldpiece Instruments includes a field replaceable smart sensor that’s fast enough for walk-around tests. Visual and audio alerts increase proportionally in frequency as the concentration of CO increases. CO levels are displayed from 0 to 1000 PPM. For added visibility there is a bright blue backlight. The ergonomic shape and rubber boot make it easy to hold and tough enough for HVACR field service. Booth #4543. Circle 117 on the reader service card.

Regal Beloit
The Browning belt drive upgrade program can help optimize and improve performance for your building’s belt drives, saving you energy/maintenance expenditure! Input data to the “Retrofit Audit Sheet” in the Browning Toolbox Technician app, and our team will create an optimization report with ROI for your application. Booth #3714.
